

CELL-BASED FOOD INGREDIENTS AT INDUSTRIAL SCALE

Peace of Meat creates and supplies cultured meat products. We work with partners in the plant-based foods and meat industries to create tasty and nutritious meat alternatives that positively contribute to sustainability and animal welfare.

2050

10 BILLION PEOPLE

X2 PROTEIN DEMAND

X2 EARTH NEEDED

Our cultured meat products are 100% non-GMO and microcarrier-free. Cellular-based meat can be reproduced continuously without further impact on the animal and with reduced emissions.

With our innovative cell platform for industrialized cultured meat production (PMC), we use stem cells, cell media and clean energy to sustainably grow animal fat cells and muscle cells in bioreactors.

ROADMAP

2022 ◦ Serum-free cell line  
◦ First prototype

2023 ◦ Final prototype for regulatory approval  
◦ Move to new pilot plant facility

2024 ◦ Regulatory approval  
◦ Small-scale production operations  
◦ Design large-scale production facility

PEACE OF MEAT HIGHLIGHTS

Founded Aug 2019 and acquired by MeaTech 3D in Feb 2021 for ~\$20 million

Stable, unique cell line with a clear upscaling path

~\$7.5 million invested in technology development

Variety of new cultivated hybrid products

Clear R&D and go-to-market strategy

Plan to establish a pilot plant within 12 months
